Summary

Hello, I'm Rishikesh, a dedicated MCA student with a solid foundation in Java, object-oriented programming, web development, and MySQL. I am eager to leverage my skills and knowledge in a professional setting. Passionate about contributing to a dynamic team, I aim to gain valuable experience and stay abreast of the latest trends and practices in the IT industry.

Projects

Book Store (Web Application)

- Developed a React bookstore application, enabling seamless online book purchasing similar to e-commerce platforms.
- Utilized Tailwind CSS for frontend styling, enhancing the user interface and experience of the MERN bookstore application.
- GitHub: <https://github.com/Rishikesh-00/bookly.git>

Institute Management System (Desktop Application)

- Developed a Java-based desktop application for an education institute, integrating features like student registration, admission, and fee management.
- Implemented Oracle for efficient database management, facilitating seamless organization of student records, library resources, and branch details.
- GitHub: https://github.com/Rishikesh-00/Institute_Management_System.git

Hobbies and Interests

- Playing Chess and Badminton
- Cooking and experimenting with new recipes
